

# EBS 260

## Up to 57 mm printing height

With its characteristic embossed printing, the handjet 260 now reaches a printing height of up to 57 mm. It is therefore the perfect mobile printer for all applications that require a strong readability also from larger distances.

With its 32 nozzles, it can also print datamatrix codes and simple graphics. The Handjet 260 is light, easy to manage and cordless. With the available ink spectrum, it can print on almost all surfaces (metal, plastic film, wood, glass, concrete) without being limited in place or in time.

The IP 44 classification allows you to also use the printer outside.

Printing projects can either be produced directly with the LCD-touchscreen or broadcasted wireless from the PC.

### Particular suited for

Users who wants uncomplicated fonts in up to 57 mm font height.

57 mm printing height with 32 nozzles

Robust casing design

Memory for up to 30 texts and LED touchscreen

Intuitive usage

Battery for up to 16 working hours

Prints easy-to-read text

Wide ink spectrum for all surfaces

Prints in all directions: forward, backward and even overhead

## Specifications

	<b>Components</b>
<b>Number of nozzles</b>	• 32 nozzles
<b>Printing height</b>	• 7 mm until 57 mm with 2-nozzle-printer
<b>Number of text lines per run</b>	• Up to 4 lines
<b>Height of objects to be labelled</b>	• From 115 mm - contact with both rolls
	• From 39 mm - contact with the lower roll only to print with, for example, only 7 nozzles
	• 150 um as standard, 120 um, 170 um, 200 um optionally
	• IMB-compatible PC communicating with the printer via a cordless/radio line
<b>Nozzle diameter</b>	
<b>Editing texts and print parameters, Printer control</b>	
<b>Storage capacity</b>	• 2 GB, this corresponds with 50.000 texts or more
<b>Max. number of characters per text</b>	• Constrained by internal memory of the printer
<b>National characters</b>	• Diacritical national characters, Chinese characters, Cyrillic
<b>Special characters</b>	• Graphics characters for information, warning, handling etc.
<b>Graphics</b>	• Graphic printing saved in PNG format
<b>Variable fields</b>	• Date and time in any format
	• Including expiry date/period of service
	• Incremental or decremental counters
	• 1D and 2D barcodes
	• Files from external devices
<b>Timing</b>	• Synchronised with rotational speed of the lower guide roll
<b>Power supply</b>	• Battery powered with a pack 6 Li-Ion cells
	• 16 hours calculated for 60 printouts
	• Automatically via an external 24V / 1 A DC power pack
	• Charging time - less than 300 minutes (< 5 hours)
	• Number of charging cycles: 500 (up to 70% of initial capacity)
<b>Inks</b>	• Available in easily detachable containers
	• Made on the basis of alcohol, acetone or water, in various colors (among others in white, yellow, blue, green, red or black)
<b>Dimensions (L/W/H)</b>	• Container capacity 200ml
<b>Weight</b>	• 330/ 88/ 277 mm
	• 1580 g
	<b>Working temperature range</b>
	• 41-104°F
	<b>Warranty</b>
	• 12 Months (consumables excluded)
